MANAGING DIRECTOR'S MESSAGE

*"I thought 2020 would be the year I got everything I wanted.
Now I know 2020 is the year I appreciate everything I have."*

- Melody Godfred

As I write this well into 2021, the quote above sums up what most people felt about the happenings of the past year. The appreciation for those normal things we took for granted is also laced with gratefulness for the things we still have.

For TYPA, I think we can sum up our gratefulness in three words; Country, Community and Campus.

At a time when much of the rest of the world is facing health, social, and economic crises, we are so grateful to live in a country with strong leadership and a sense of unity, where individual and collective decisions are made for the common good.

As for community, there are not enough words to describe how grateful I am to be part of this community. Your care and understanding in these challenging times and your unwavering support of TYPA remained steadfast throughout the continuing challenges of the pandemic. Thank you!

And then there is this campus. We simply could not offer the incredibly diverse programs and activities that you will find in this brochure without a safe and secure campus. Over the last year, TAS campus' strict

protocols ensured an almost uninterrupted time frame for our students' schooling and activities. We are very grateful to TAS for their support and encouragement throughout these challenging times.

Lastly but most importantly, there are some very special people that made all of this happen. Without them, none of what you are about to read would be possible – the magnificent TYPA staff.

As well as the 130 dedicated professional instructors, our cheerful and hard-working office staff (pictured below), without exception, rose to the challenge this past year. They worked tirelessly on both weekdays and weekends to manage the entrances and exits, explain procedures and conduct checks, thereby ensuring that we did our part in keeping the campus safe while continuing to offer dynamic, quality programs to our community.

So, please turn the page, as we hope to do one day on these challenging times, and peruse all that TYPA offers our wonderful community.

SPORTS

GENERAL INFORMATION

TYPA provides basketball, soccer and baseball leagues for lower school students. Emphasis is placed on participation, learning and fun through sports. For these sports, each student will be able to partake in one weekly practice session (see below for days and times) and Saturday games. Students will be split into teams and will compete against other students of the same age. Players of all abilities are welcome to join in the excitement of our sports programs.

In order for teams to be evenly matched within the league, grades 2–5 players must be present on skill assessment days. Players are evaluated by clinic coaches at that time. You will not be placed on a team if you have not completed the assessment.

Please be aware of the registration cutoff date as we cannot give refunds or credits after this date.

Practices and games may be cancelled due to severe weather or poor air quality. If two or more Saturdays are cancelled due to poor conditions, we will endeavor to schedule doubleheaders to make up the games.

Our music instructors are exceptionally talented with a wealth of experience, and most possess Master of Music degrees specializing in music performance. Many continue to perform in recitals and concerts throughout the year.

Students should either own or rent their own instrument for weekly practice. While TYPA doesn’t sell or rent instruments, we can assist you in finding where you can either buy or rent one.

Each private lesson student has the option to perform in a music recital at the end of the school year.

Please do not enroll in the TYPA music program unless you are able to make a weekly commitment to your music lessons. MARTIAL ARTS

GENERAL INFORMATION

TYPA offers martial arts classes in four distinct disciplines – Aikido, Karate, Nin-ja, and Taekwon-Do. Martial arts teaches respect, courtesy and self-discipline, and improves flexibility, strength, stamina, health, and fitness.

Discipline, attitude, and respect for martial arts will be emphasized. Examples of the above guidelines include promptness to class, proper wearing of uniforms, and respect for the martial arts master and fellow students.

All TYPA martial arts classes are minimal body contact. Older beginning students or students with experience in a different martial arts discipline may attend higher-level classes at the discretion of the instructor.

Belt Advancement Tests

Testing criteria will not only include skills, but also discipline, attitude, and respect displayed throughout the semester. Students will not advance to the next belt level unless all these criteria are met to the satisfaction of the instructor. It is not mandatory to take the test, however, it is recommended if your child would like to advance to the next level. **Please note there will be an additional cost for tests.**

Dress Code Policy for Martial Arts

TYPA does not sell or otherwise provide uniforms. Students are required to purchase their own uniforms from a local retailer or with assistance from the instructor. Students must be in a properly-fitted uniform by the third lesson or they must sit out of the class. Each discipline has its own unique uniform and a different belt system.

AIKIDO

Aikido in its present form was developed in Japan in the early 20th century. Aikido is seen not only as a system of self-defense, but also as a means of self-cultivation and improvement. It is unique among martial arts in that the majority of techniques are based on aggressors making the first move and using their energy and momentum to neutralize them.

Aikido Grades: 3-12

On a physical level, Aikido involves some throws and joint locks. It focuses not on punching or kicking, but rather on using the opponent's energy to gain control and throw him away from you.

TIGER TOTS

ABOUT THE TIGER TOTS PROGRAM

At Tiger Tots, we provide a safe, nurturing learning environment for children from the ages of 18 months to 6 years. Our programs have been designed to follow North American standards, and we provide age-appropriate educational goals, values, and philosophies that are implemented within a challenging and exciting learning environment. Play sets the stage for learning and provides the medium through which the children may imitate, explore, test ideas, acquire information, and draw conclusions. Our experienced, caring personnel emphasize and foster a positive self-image while encouraging uniqueness within socialization. The unique interests of each child are used as a guide for inquiries and exploration within the classroom. Tiger Tots also offers weekly gymnastics, music, and

Kidsportz classes (4s and 5s), provided by TYP A specialized instructors. In addition, Mandarin classes are available for those students who want to acquire a new language or improve their first language.

PRESCHOOL PROGRAMS

5s (Five-Year-Old) Kindergarten Program

For children who are five before Sept. 1, 2021.

Our Kindergarten program helps to prepare learners for success throughout their academic life. We develop a balance of child-initiated learning and teacher-directed opportunities by closely following North American benchmarks and learning standards. Our curriculum covers a wide range of academic areas including phonics, writing workshops, guided reading, math, science, social studies, the arts (visual and musical), fitness and movement, and social and emotional development.

We aim to promote well-being, self-help, collaboration, and independence. We value each child as a unique individual and encourage their curiosity through themes that have emerged from their own interests. Children face new challenges, make new discoveries, and happily celebrate their own efforts and achievements and those of others while in a safe, loving learning environment.

4s (Four-Year-Old) Pre-Kindergarten Program

For children who are four before Sept. 1, 2021.

The PreK Program is an age-appropriate instructional program that prepares students for a successful transition to kindergarten and beyond. It helps children advance their skills in core pre-academic areas such as phonics, math, and science, while at the same time helping them excel in other essential areas such as art, social and emotional well-being, and health and wellness. Our child-centered approach ensures that children are exposed to a diverse array of learning activities, and that they thrive in all areas of childhood development, creative thinking, complex problem solving, empathetic collaboration, curious investigation, and astute decision making.

We engage in and encourage each child's natural curiosity and interest in learning. Our goal is to have

children actively participate in the learning process and provide them with the opportunity to complete assigned tasks with a level of independence. This allows for both direct and indirect acquisition of knowledge and skills.

3s (Three-Year-Old) Playgroup Program

For children who are three before Sept. 1, 2021.

The Three-Year-Old Program is designed to encourage a balance of child-initiated and teacher-facilitated activities. This program offers children a variety of choices provided within a carefully prepared indoor and outdoor environment. This environment includes art, dramatic play, blocks, manipulatives, language arts, books, music, water and sand play, as well as activities to build large and small motor skills. Our goals include the encouragement of each child's natural curiosity and interest in learning. We feel it is important for children to actively participate in the learning process, and therefore provide many opportunities for learning by doing, for both indirect and direct acquisition of new knowledge and skills. Our three-year-old classrooms are located at Tiger Tots Place.

Emphasis in these groups is on learning through play in an environment planned to encourage discovery, independence, and social interaction. In order to develop self-esteem and social competence, children are encouraged to help themselves, take initiative, and become increasingly independent. To help children develop a sense of trust and feel comfortable from the start, a parent or consistent caregiver may remain in the classroom until the teaching staff indicates that a separation is appropriate and can be comfortably accomplished.

2s (Two-Year-Old) Playgroup Program

For children who are two before Sept. 1, 2021.

Two-Year-Old Playgroups meet either two, three or five days each week, depending on the schedule you choose at registration. There is also the option of the full-day two-year-old program, which includes nap time, free choice time, and story time. Our two-year-old classrooms are located at Tiger Tots Place.

This class will promote a respect for natural materials and encourage children's appreciation and sensitivity to color, size, shape and symmetry. The course will also create rich language opportunities for teachers to talk to children about the aesthetic qualities of the materials they are using, as well as discuss design and patterning. “We love being part of the Tiger Tots family. From the always helpful staff to the dedicated teachers, our son has had the best Pre-K and kindergarten experience that we could have hoped for. There is a great balance between playing and learning. Because of that, our son has grown both socially and intellectually. The dedication of the teachers is beyond measure and we see the results everyday in our son and what he has learned.” -Kim Lee

Skyrock Tech Summer Camp Grades: 1-7

JUN. 7 - JUL. 16

In this camp, students will discover a world of coding, invention and robotics that goes beyond the usual battles, destruction and droids. This program is about using design and engineering skills to invent and build projects that solve problems, look great or make parents go 'Wow!' when they see what their kid has made.

This year we are building the camp around three central themes, with a different theme taking place each week. The three themes are Weather and Climate, Transportation and Navigation, and Health and Wearable Technology.

Weather and Climate will enable students to explore sensors and hardware that affect changes in the environment around us. We will use a microcontroller and open-source electronics to build systems that alter conditions for organisms to live in, whether this may be a house or greenhouse.

Transportation and Navigation will introduce students to autonomous driving devices and other cutting edge robotic tools. We will discover how we will build cities of the future with connected roads and environments. In this course we also introduce students to computer vision, looking at how we use AI to enable cameras to detect specific actions.

Health and Wearables will explore how smart devices like the Apple Watch and Fitbit measure your step count and heart rate. We will explore how this technology can be used to improve our habits to improve our health. We will use different sensors, such as accelerometers, thermometers and pulse sensors to detect data about ourselves and understand how to display it to keep ourselves healthy and also safe during pandemics!

 **FULL DAY CAMP: MON. - FRI. 9:00am-4:00 pm**
 **Cost: \$24,000 (A delicious lunch is provided)**
