MANAGING DIRECTOR'S MESSAGE

Every year, when this magazine comes together, I'm struck by how much actually happens at TYPA. It's easy to forget, in the middle of busy weeks and full schedules, just how many classes, teams, camps, performances, and small daily moments are happening across our programs. None of that works without the people behind it — our teachers, coaches, instructors, and staff — who show up every day with energy, patience, and genuine care for the kids in our community. They are, without question, TYPA's greatest strength.

Looking ahead, my focus as Managing Director is pretty simple, even if the work itself isn't: **more access, more participation, and staying true to our mission.**

TYPA serves a wide and diverse international community, and we want our programs to reflect that. Over the coming years, we are intentionally working to increase participation across all areas—early childhood, sports, arts, camps, and enrichment—by growing programs thoughtfully and making it easier for families to be involved. An important part of this effort is continuing to strengthen and promote our financial aid services, which help ensure that cost is not a barrier to participation. We believe strongly that TYPA should be a place where families feel welcome and supported, regardless of their circumstances.

At the same time, we are working behind the scenes to improve how families interact with TYPA. While our programs have grown and evolved over many years, some of our systems need to catch up. We are currently on a careful path toward a more integrated online registration experience—one that supports families, reduces confusion, and makes participation easier. This is something we are approaching deliberately, with the goal of introducing it when it is truly ready and serves the community well.

What hasn't changed—and won't—is our focus on people and purpose. TYPA is not about any single program or initiative. It's about creating opportunities for kids to learn new skills, build confidence, find community, and enjoy being active and creative in a supportive environment. Growth, for us, means more kids engaged, more families connected, and more ways to live out our mission every day.

Thank you for being part of TYPA and for the trust you place in our team. We are proud of what we do, grateful for the people who make it possible, and excited about where we're headed together.

Best wishes,

SPORTS

GENERAL INFORMATION

The TYPA sports calendar is organized into two primary seasons, with additional offerings available after Spring Break. The first season starts with basketball and concludes in December. The second season is soccer, which will kick off in the Spring semester and continue through the end of the school year. Children of all skill levels are encouraged to participate in our sports programs. Every player will receive a team jersey, a team photo, a souvenir, and take part in an end-of-season awards ceremony.

As our goal is to develop each player's skills and knowledge of the game, we strive for teams to be as evenly matched as possible. **For athletes in 2nd through 5th grades, there is a mandatory skills assessment done by our sports team.** Players will be placed on a team once the assessment has been completed. **When sports practices are cancelled due to bad weather or other unforeseen circumstances, refunds, credits or make ups will not be given.** Games may be cancelled due to severe weather or poor air quality.

- ◆ PreK and K-1 athletes must be accompanied by their parents / guardians on Saturday game days
- ◆ Our sports seasons are only successful if we get enough parent volunteers to coach our Saturday games. If you would like to get involved, please email towns@typa.org.tw

I TENNIS

TYPA Tennis is a great opportunity for your child to learn various tennis techniques with our outstanding tennis coaches.

Tennis students will need to purchase their own tennis rackets to be used for tennis lessons. Tennis or sports shoes must be worn to avoid injuries and students will also need to wear proper sportswear in class.

All tennis lessons are scheduled in the following manner:

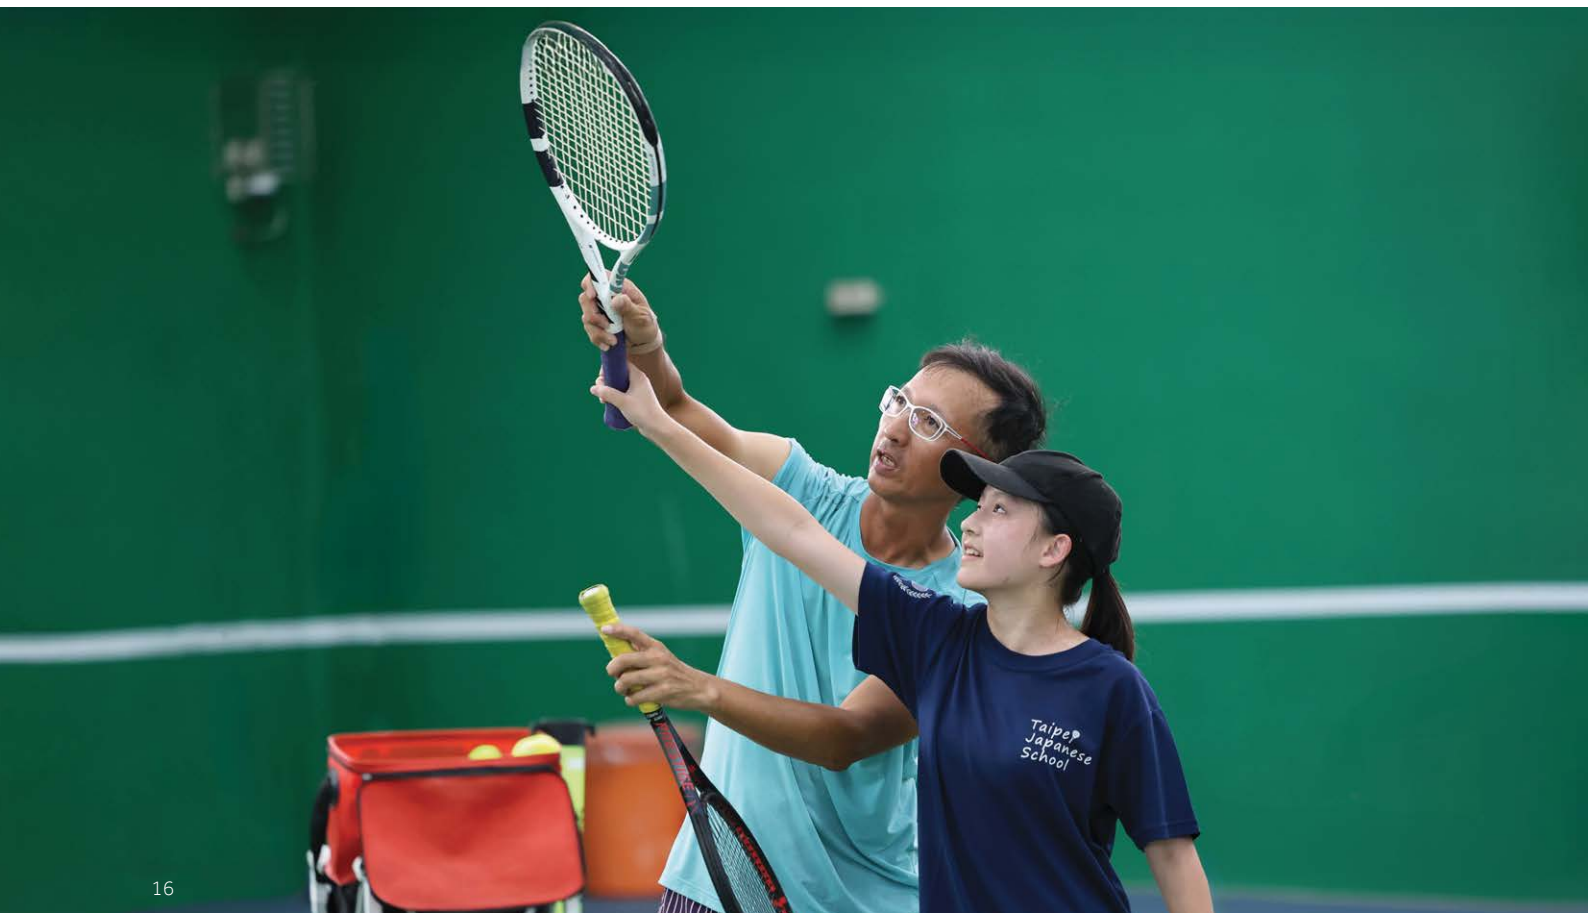

1. Toward the end of each semester, re-registration for continuing students takes place.
2. After re-registration, open registration takes place.
3. Any available spaces remaining are then offered on a first-come, first-served basis.
4. If a desired coach or time is unavailable, names are placed on a waiting list.
5. All waiting lists and special requests expire at the end of each semester.

Tennis Courts Usage

Please note that TYPA tennis lessons will be held in the TAS Rubber D Area and TAS Indoor Tennis Courts (only available on Saturday 1:00 pm- 5:30 pm).

Sometimes we will be permitted to use the TAS indoor or rooftop tennis facilities for lessons but please understand that it is not guaranteed for every semester. When the indoor or rooftop courts are unavailable, we will move back to offer lessons in the TAS Rubber D Area. We will not issue any credits or refunds or makeup lessons when there are facility changes.

There will be times during the year when tennis lessons may be canceled due to conflicts with TAS activities. Members should note that TAS's curricular programs take priority over TYPA activities. Please take this into consideration when signing up for TYPA tennis programs.

Cancellation Policy

After the second week of the semester, no credits or refunds will be given due to withdrawals and no schedule changes will be allowed. There will be no credits or refunds for missed tennis clinics, group lessons, or semi-private lessons. Private lessons are allowed one cancellation per semester, but the cancellation must be done at least 24 hours in advance. Please note, canceled tennis lessons will not be made up.

Regarding injury cancellation, we will only issue a refund to injured students if they withdraw for the rest of the semester. This will be on a prorated basis. A \$500 processing fee will be deducted from the remaining program cost and the TYPA office must be informed as soon as possible of the injury. Please provide a medical certificate when applying for an injury refund. Once the injury application has been submitted, the student will lose priority registration for the re-registration period.

Announcements on the cancellations of tennis lessons due to inclement weather will be made at 2:00 pm on the day of the lesson. Text messages about cancellation will be sent to parents once the cancellation is confirmed. If cancellations occur after 3:45 pm, tennis coaches will contact the parents individually. Parents can call the TYPA office to inquire about cancellations after 2:00 pm. Lessons canceled by TYPA will be credited or refunded at the end of the semester.

MUSIC

GENERAL INFORMATION

Music at TYPA is for students of all ages as well as abilities. We offer 30, 45, or 60 minutes of private music instruction in Cello, Flute, Guitar, Piano, Violin, and Voice. We also offer group lessons for flute, guitar, and the children's choir.

Our music instructors are exceptionally talented with a wealth of experience, and most possess Master of Music degrees specializing in music performance with many still performing in recitals and concerts throughout the year.

Students should either own or rent their own instrument for weekly practice. While TYPA doesn't sell or rent instruments, we can assist you in finding one either to buy or for rent. A music recital will be held at the end of the school year and each student has the option to participate.

MUSIC AGREEMENT

Music lessons can begin at any time during the semester depending on availability and lessons will be prorated from the actual starting date.

Every parent and student is required to read and understand the TYPA Music Agreement. The Music Agreement is available at the TYPA office, on our website, or in the TYPA Music Notebook.

Please do not enroll in the TYPA music program unless you are able to make a weekly commitment to your music lessons. In the event you are not able to attend a class, a friend or family member will not be allowed to take that class for you unless they are already a student of the same TYPA music teacher.

 *Each student is only allowed one make up lesson per semester (except Camp Taiwan).*

Please note that there may be additional costs for music books.

RECITALS

There will be an annual music recital held at the end of the Spring semester. It will take place in April and/or May on the Taipei American School campus. The music recital is an excellent opportunity for students to boost their confidence and show off their skills in front of the audience!

MARTIAL ARTS

GENERAL INFORMATION

TYPA offers martial arts classes in four distinct disciplines – Aikido, Karate, Ninja, and Taekwon-Do. Martial arts teaches respect, courtesy, self-discipline, and improves flexibility, strength, stamina, health, and fitness.

Discipline, attitude, and respect for martial arts will be emphasized in each class. Examples of the above guidelines include promptness to class, proper wearing of uniforms, and respect for the martial arts master and fellow students.

There is minimal body contact in all martial arts classes with occasional sparring practice for students at a more advanced level.

Belt Advancement Tests

Each martial arts discipline has a colored belt (ranking) system allowing students to set their goals and challenge themselves. Testing criteria will not only include skills, but also discipline, attitude, and respect displayed throughout the semester. Students will not

advance to the next belt level unless all these criteria are met to the satisfaction of the instructor. It is not mandatory to take the test, however, it is recommended if your child would like to advance to the next level.

♦ *Students will be required to purchase a uniform in the beginning of semester and will have the opportunity to take a test at the end of the semester. Please note there will be an additional cost for tests.*

Dress Code Policy for Martial Arts

Students will be required to wear a specific uniform for each discipline. They are required to purchase their own uniforms with assistance from the instructor. Students must be in a properly fitted uniform by the third lesson or they will not be able to participate in class. Each discipline has its own unique uniform and a different belt system. For certain levels in each discipline, additional equipment such as gloves or martial arts shin guards is required.

It is unique among martial arts in that the majority of techniques are based on aggressors making the first move and using their energy and momentum to neutralize them.

Aikido

ITF TAEKWON-DO (ITF STYLE)

ITF Taekwon-Do follows the tenets and philosophy of its founder, General Choi Hong Hi. Its philosophy is based on the essential tenets of courtesy, integrity, perseverance, self-control and indomitable spirit. It is essential to apply the tenets of Taekwon-Do and fully embody them both inside and outside the training area ('dojang'). This should not be seen as mere repetition or a habit of memory, but rather as adopting a way of life that aligns us with the power that practicing Taekwon-Do offers. Taekwon-Do, with its four facets, is one of the most complete martial arts: as a self-defense method, as a sport, as a means of social development, and, of course, as a way of life.

The Young Inventors 2

Grades: 2-4

Students make complex inventions that dive deeper into the structure, mechanical, and electronic engineering concepts. Whether students are new to the program or completed Young Inventors 1, everyone builds projects involving circuit design that include motors and sensors. This program is one of the most fun ways to explore the Next Generation Science Standards and build Engineering Habits of Mind such as problem-solving, visualization, and improving, etc. Students will take a project home every 3 weeks.

The Young Inventors 3

Grades: 3-5

Students will combine all of their understanding of mechanical and structural engineering concepts with more advanced electrical engineering concepts as we include microcontrollers (mini computers called MicroBits with circuit boards). Combining these microcontrollers with sensors allows us to build interactive and automated inventions as they react to the environment. In addition, students will design components for their inventions using Computer-Aided Design and 3D printing. Students will take home a project every 4 weeks.

CODE WIZARDS

Code Wizards 1

Grades: 1-2

In this introductory curriculum to coding, kids will use the best platforms in the world designed to break down complex computer science concepts into age-appropriate learning activities. We use multiple tools for this curriculum including Scratch, a block-coding platform developed by MIT. Together with skilled coding instructors, your child will learn about logic, loops, and conditionals while making games and solving puzzles built around code. This is a great starting point for children with limited digital literacy skills to progress from the iPad to a computer as they learn to log into accounts, type, keyboard shortcuts like copy/paste, save their creations, etc.

 Days: **TUE.** 2:45-3:35pm

WED. 2:45-3:35pm

THU. 2:45-3:35pm

 Cost: \$15,200 per semester / class

Code Wizards 2

Grades: 2-4

This curriculum builds on the computer science basics students learn in the Coding Wizards 1 program. We will move on to more advanced coding platforms such as Make-Code, developed by Microsoft, which uses block code and typed code, easily converting back and forth between them to help students transition more smoothly to coding exclusively by typing. Students will code complex games and be challenged to hack them and remix them by editing the code. Each game they create explores the math logic and physics required to make their games simulate the real world.

 Days: **TUE.** 3:45-4:40pm

THU. 3:45-4:40pm

FRI. 2:45-3:35pm

Code Wizards 3

Grades: 3-5

In this Python programming course, teachers will emphasize and reinforce fundamental computer science skills, challenging students to use their creativity to remix their code to make their games and projects more interesting and complex. As students graduate from block code, they will have taken the first step toward understanding how computer science is driving a technological revolution in the 21st century. This program plants the seeds of AP Computer Science early as we focus 100% on creating projects to boost engagement levels with the subject.

 Days: **TUE.** 3:45-4:40pm

Vibe Coding: Game Design Studio

Grades: 3-5

This advanced after-school program is designed for students who already have a foundation in coding and are ready to start creating their own games. Using Vibe Coding, students move beyond following tutorials and begin designing interactive games driven by their own ideas, logic, and creativity.

Across the course, students will plan, build, test, and refine original games—learning how to combine coding structures, game mechanics, and user experience. Emphasis is placed on problem-solving, iteration, and creative ownership, helping students develop confidence as young digital creators rather than just code learners.

Prerequisite: Completion of Code Wizards 2 or equivalent coding experience.

 Days: **WED.** 3:45-4:40pm

FRI. 3:45-4:40pm

Behind every game are multiple strategies, and behind every strategy is logic and mathematical thinking. Our minds recognize patterns, calculate risk, and make decisions using math when playing strategy games - but what if we added some numbers and basic formulas to these decisions? Game-playing superpowers are unlocked!

Game Strategy Math extracts and visualizes math and logic for kids as we play games like Catan, Yahtzee, Connect 4, and more. We even use code to create digital versions in Scratch that they can play against - human versus machine! This program is perfect for kids who want to develop more confidence in Math, especially those that aspire to engage in Math competitions like the Olympiad and AMC.

Our programs have been designed to follow North American standards, and we provide age-appropriate educational goals, values, and philosophies that are implemented within a challenging and exciting learning environment. Play sets the stage for learning and provides the medium through which the children may imitate, explore, test ideas, acquire information, and draw conclusions. Our experienced, caring personnel emphasize and foster a positive self-image while encouraging uniqueness within socialization. The unique interests of each child are used as a guide for inquiries and exploration within the classroom. Tiger Tots also offers weekly gymnastics, music, and Kidzsports classes (4s and 5s), provided by

specialized TYPA instructors. In addition, Mandarin classes are available for those students who want to acquire a new language or improve their first language.

Our Kindergarten program helps to prepare learners for success throughout their academic life. We develop a balance of child-initiated learning and teacher-directed opportunities by closely following North American benchmarks and learning standards. Our curriculum covers a wide range of academic areas including phonics, writing workshops, guided reading, math, science, social studies, the arts (visual and musical), fitness and movement, and social and emotional development.

We aim to promote well-being, self-help, collaboration, and independence. The PreK Program is an age-appropriate instructional program that prepares students for a successful transition to kindergarten and beyond. It helps children advance their skills in core pre-academic areas such as phonics, math and science, while at the same time helping them excel in other essential areas such as art, social and emotional well-being, and health and wellness. Our child-centered approach ensures that children are exposed to a diverse array of learning activities, and that they thrive in all areas of childhood development, creative thinking, complex problem solving, empathetic collaboration, curious investigation and astute decision making.

We engage in and encourage each child's natural curiosity and interest in learning. Our goal is to have children actively participate in the learning process and provide them with the opportunity to complete assigned tasks with a level of independence. This allows for both direct and indirect acquisition of knowledge and skills.

Summer Tech Camp

Grades: 1-8 (in Fall 2026)

JUN. 8 - JUL. 31

A fun, hands-on summer camp where children explore science, technology, and engineering through creativity, storytelling, and real-world problem solving—designed to match each age group's learning stage.

1. Grades 1-2: "Curious Explorers"

For our youngest learners, STEM comes alive through imagination and play. Students build, experiment, and discover through guided activities that develop confidence, focus, and curiosity—no prior experience needed.

Camp Themes: Arctic Explorers / Time Travelling Engineers / Sorcery School

What Your Child Will Do: Explore ice, motion, and materials / Build simple machines and circuits / Mix safe chemical reactions / Create hands-on projects every day

Skills Developed: Curiosity and observation / Fine motor skills / Following instructions / Confidence in learning

2. Grades 3-4: "Creative Problem Solvers"

Students begin applying STEM concepts more independently through hands-on engineering challenges. With increased collaboration and experimentation, children learn to test ideas, solve problems, and think like young engineers.

Camp Themes: Arctic Explorers / Time Travelling Engineers / Sorcery School

What Your Child Will Do: Design and test structures / Build and program simple robots / Explore ecosystems and energy / Use sensors, motors, and lights

Skills Developed: Critical thinking / Teamwork / Logical reasoning / Creative problem-solving

3. Grades 5-8: "Confident Young Engineers"

Designed for older students ready for independence, these camps focus on open-ended projects rather than step-by-step instructions. Students take ownership of their designs, learning how real engineers plan, build, test, and improve ideas.

Camp Focus Areas: Future Machines / Fantastic Contraptions / Amusement Park Engineering

What Your Child Will Do: Program robots and machines / Design mechanical systems / Apply physics and safety logic / Build original, working projects

Skills Developed: Engineering design thinking / Independence and resilience / Collaboration and leadership / Real-world problem solving

 Days: **MON. - FRI.** 9:00am - 4:00pm
